- intelliJ
- Postman

EXPERIENCE

SME SHIPPING   01/06/2019 - 31/12/2020

- Responsible for communicating with clients to gather requirements, analyzing and designing systems to meet their needs, maintaining and resolving system issues, and developing new functionalities. Tasks also include testing the system for accuracy and ensuring its efficient deployment to production.

SILKSPAN 21/06/2021 - 21/06/2022

- Develop and manage API services to support system functionality, perform UAT testing, maintain system performance, and create new functions while enhancing the UI to meet user needs, following the Agile methodology.

MOCAP LIMITED 20/09/2022 - 31/03/2023

Project: Report List

- Developed functions to add data to the report table, query and display data, export Xlsx files, send emails, and duplicate data to enhance system usability.

Project: Survey

- Added new quiz questions to the survey page to expand data collection and improve the efficiency of gathering insights from users.

Project: Quotation

- Implemented calculation functions on the quotation page and developed the ability to export data as Xlsx files for more efficient data management.

AXONSTECH   01/04/2023 - 31/01/2025

- Working in an Agile environment, I gather requirements to develop Azure login, APIs, iframes for Power BI, insight features, and report tables. I enhance CRM features and Visitplan features systems for multi-company use, add language translation features, and integrate quotation and PDF/CSV export. I handle system maintenance and use CI/CD pipelines with IT support before deployment.
